Percentage of pay bill spent on facility time

Provide the figures requested in the first column of the table below to determine the percentage of your total pay bill spent on paying employees who were relevant union officials for facility time during the relevant period.

Total cost of facility time	<i>£732.50</i>
Total pay bill	<i>£10,952,597.10</i>
Percentage of the total pay bill spent on facility time	<i>0.01%</i>

* The hourly cost is calculated by:

- Adding:
 - The gross amount spent on wages by the employer in respect of the employee during the period
 - The amount spent on pension contributions by the employer in respect of the employee during the period
 - The amount of National Insurance contributions paid by the employer in respect of the employee during the period
- Dividing the above amount by the working hours of the employee during the period

A notional hourly cost must be used here where the employee is identifiable (i.e. a person reading this would be able to identify the individual employee's wages). The notional hourly cost is what 'reasonable pay' would be for the type of work the identifiable employee ordinarily did for the employer over the relevant period.
